

Aneesh Kumar Mourya

Fatehpur, UP, India | +91 73940 69776 | aneeshkrmourya@gmail.com | linkedin.com/in/aneeshmourya-1b2a15375

Technical Skills

Languages: Python, Java, TypeScript/JavaScript, SQL, HTML/CSS
AI/ML & GenAI: Deep Learning, TensorFlow/Keras, scikit-learn, Generative AI integration, prompt engineering, LLM applications, model evaluation & QA
Backend & APIs: FastAPI, microservices concepts, multi-tenant architecture (built with AI-assisted guidance)
Databases: PostgreSQL (Supabase), SQL, NoSQL concepts, data modeling
DevOps & Cloud: Git, Render, Vercel
Data Engineering: ETL pipelines, data cleaning, preprocessing, feature engineering

Experience

AI Response Analyst (Business Analyst) **Jan 2026 – May 2026**
Remote *Turing*

- Evaluated LLM and AI agent outputs across multi-domain tasks (research, document search, scheduling), assessing reasoning quality, factual accuracy, and task-completion fidelity at production scale.
- Applied prompt engineering and evaluation rubric design to improve model response quality; fed structured insights into model refinement pipelines.
- Collaborated with cross-functional global teams on annotation quality and AI feedback workflows.

Projects

CoachBot – Full-Stack AI SaaS (Solo Build, approx. 90% complete) **2025 – Present**

- FastAPI · React/TypeScript · Supabase/PostgreSQL · GenAI API · Render · Vercel*
- Architected a multi-tenant SaaS platform: student management, attendance, fee tracking, scheduling, and PTM booking — sole architect and engineer throughout.
- Integrated a GenAI API for a multilingual (Hindi/English) GenAI chatbot and automated WhatsApp notification workflows — end-to-end agentic communication pipeline.
- Designed a FastAPI backend, modelled a PostgreSQL schema on Supabase, and deployed via Render + Vercel.

Solar Panel Defect Detection – Research Intern, Amity Institute of IT **May – Jul 2025**

- Python · CNN · VGG16 · ResNet50 · TensorFlow · GAN Augmentation*
- Raised defect-classification accuracy from 62.6% to 93.1% using GAN augmentation, class balancing, and feature engineering across CNN, VGG16, ResNet50 models.

StressPPG – Real-Time Stress Detection System **2026**

- Python · scikit-learn · OpenCV · Streamlit*
- End-to-end ML pipeline (PPG signal preprocessing → Random Forest, 84.3% accuracy) deployed as an interactive Streamlit web app with real-time visualizations.

Education

Amity University, Lucknow **2023 – 2026 (Expected)**
CGPA: 8.7 / 10 *BSc Information Technology*

Publications & Certifications

- Co-authored peer-reviewed paper: *Enhancing Precision Agriculture using Adaptive ML Models* (AISD-2024 Workshop) — 92% precision, 90% accuracy from wireless sensor data. [View Paper]
- Oracle Cloud Infrastructure 2025: AI Foundations Associate · Cisco Networking Academy: Intro to Data Science · Intro to Cybersecurity.
- Cybersecurity Job Simulation — Mastercard & NY Jobs CEO Council, via Forage (January 2026).
- NPTEL (IIT Madras): Design Thinking – A Primer — Elite, 67% (Jul–Aug 2024).
